

Dear Premier Horgan,

There is an issue that will have significant impact on the BC education system. The government is changing the BC education funding model which has been in place since 2002. The new funding model will see **even less funding** to the BC education system, which is already funding \$1800 less per student than the national average.

I would ask the NDP government to reconsider their current proposal for the BC education funding model and consider a new model that is centered on student's success. BC needs an increase to education funding so that we can fully support our students.

I have made a website with all the information you will need. (<https://bceducationfunding.weebly.com>)

Thank you for your time and consideration

Richard Obayashi
